6 April 1956

MEMORANDUM FOR: Project Director

SUBJECT: Operational Communications for Your Attention

REFERENCE: "Reports Control Manual," February 1956,
TS #142985

1. After having thoroughly reviewed the referenced Manual according to your verbal instructions of 5 April, I would like to suggest that one of the two blue teletype copies of each of the following reports be submitted by the Director of Operations for your attention:

25X1

2. I would further like to recommend that it might facilitate your work if the above were made available to me; I could scan them for you and present to you those reports which would be of interest to you. Such a daily presentation would, naturally, not preclude either the duty officer, the Director or Deputy Director of Operations or their representative from getting in touch with you on an emergency basis; but rather would collect the essential product of operations communication for your review. Nor would this conflict with the daily 1300 briefing plans to give you.

25X1

3. A selection from these reports could be compiled for the Director's attention at your discretion to be presented either by yourself,  or by the regular system established for the Director's viewing of the Project Cables.
